

2019/20 estimated MYA corn price is the estimate from the midpoint of the September 2019 USDA World Agricultural Supply and Demand Estimates. 2019/20 estimated PLC payment per base acre is calculated by multiplying the Expected PLC Payment Rate (Reference Price less Estimated MYA price) by the individual farm's PLC Yield then multiplying by the 85% payment reduction factor. No adjustment was made for sequestration, which may be applicable.
